

A watercolor illustration of the Earth from space, showing the continents and oceans in shades of blue, green, and yellow. The background is a deep blue with white, cloud-like patterns.

UNDERSTANDING GLOBAL CHANGE: TOOLS FOR MAKING SENSE OF THE EARTH SYSTEM

Presented by Jessica Bean, PhD, Scientist/Educator at the Museum of Paleontology, UC Berkeley

Understanding the Earth as a system can help learners of all ages explain how and why our climate and ecosystems are changing and the many ways we can take action in response to these changes. Join us for this interactive workshop where participants will be introduced to the Understanding Global Change Framework, Earth system modeling tools, and materials to support planning instruction and classroom implementation.

Thursday, May 9, 2024

4:30 pm - 5:30 pm

Free for members and nonmembers.
